

Special Operatives Wave Preview

Casual Dad Games

Incoming reinforcements coming for the Special Operatives Wave! The XWA is proud to partner with Casual Dad Games for the following reveal for the upcoming release.

Hodo Joins the fight

Hodo comes to the table ready to flank, trading the ability to always fire Ordinance from his front arc for the spicy **MUST** keyword meaning that he'll fire Missiles and Torpedoes out of his Turret arc instead (!)

This combos beautifully with the new K-wing specific Power Diverted: Ordnance Configuration card, allowing K-wing pilots to still fire Ordnance at targets they have locked even if they have one (just one) Disarm token. Check out your other favorite creators for more spoilers for the pack due for full release in December!"

Check out Casual Dad's Youtube channel at <https://www.youtube.com/@casualdadgames> for a review of these cards and future reviews!
